La Vida Secreta del Nino Antes de Nacer

Dr Thomas Verny M.D., Professor John Kelly

La Vida Secreta del Nino Antes de Nacer Dr Thomas Verny M.D., Professor John Kelly

At sixteen weeks the unborn child shies away from light. At twenty weeks there is a response to speech patterns. At twenty-five weeks the baby can kick in time to music. And at six months the unborn baby can understand the subtle shifts of its mother's emotions. THE SECRET LIFE OF THE UNBORN CHILD presents for the first time the challenging results of two decades of painstaking international research into the earliest stages of life. Dr Verny's knowledge gives both mothers and fathers an unparalleled opportunity to help their unborn children. Now they can contribute actively- before and during birth- to giving their child happiness and security for the rest of his or her life. --This text refers to an out of print or unavailable edition of this title.

About the Author

Verny has a private psychiatry practice and founded the Pre- and Perinatal Psychology Association of America.

John Kelly grew up in Eau Claire, Wisconsin where his father's best friend was an engineer on the Chicago & North Western. John has been collecting railroad photos, timetables and dining car menus for 20 years and has a large collection. In addition, he has written on railroad history for Trains magazine, Trains.com, Vintage Rails and Passenger Train Journal, and has authored a half dozen photographic books on vintage trains. John lives in Madison, Wisconsin where he is employed by the Wisconsin Technical College system as a computer technician.
