Simple ideas are often the best, Fold Up Decoys (FUD) use a photorealistic print onto neoprene, which with one simple fold pops into a realistic 3D shape to mimic the target species. Initially developed for wildfowling the method was proven and the basics were then taken and applied to the UK pigeon shooter. The FUD is in essence the most compact decoy on the market, 6 full size decoys literally fold up into a very small, compact and easy to carry size.
